This game is literally real farming, so amazing realistic I love it. :). 30 dollar price tag is a bit of a joke for how "early access" this game is. At 10-15 bucks this game might be worth it, but at 30? Definitely not worth the price.

Played a handful of runner games with a coordinated (but new) group of friends, completely annihilated the Hunter each time.

Played many games as Hunter, completely steamrolled the runners each time. The average skill level of the playerbase is so low it's honestly difficult to tell what's unbalanced for who.

However, what I do know is that the weapon balancing is absolutely atrocious for the Hunter. There is zero reason to ADS with how awful the random spread is. Stack that on top of how mobile you and Runners are, I don't think there's any reason to ever ADS in this game.

The random spread even applies to being scoped in on the two sniper rifles, which is a baffling design decision. Sniper rifles are already quite bad in a game where both you and the Runners are highly mobile, and then they stack inaccuracy on top of that? There's literally zero reason to pick weapons outside of the shotgun(s) and the assault rifle. It's like they don't even play their own game.

Also, the FPS mechanics are pretty janky. It's like stepping back in time to Korean F2P shooters from the early 2000s. It's quite bad.

Can't recommend this at all, maybe if it drops on sale to 5-15 bucks. It's a neat idea but not that great in execution. The playerbase sucks at this game, so if you want an easy game to steamroll in, this might be it.. good game 10/10. The game feels incomplete, the graphics are pretty bad, environment is boring, physics are weird (hit a guy and he flew far into the air and out of view) and the swordplay is nothing great. Basically I got through 6 levels with just doing the same stabbing move in the stomach. Going to ask for refund.. if you dont want to read the review I will link my video at the end

Grey skies, dark waters A game whose backgrounds are beautifully drawn. Where it feels like your walking through impressive drawings that are real enough to make you feel that you are in a world but not completely realistic. It is the main strength of this piece of work but just as a symphony needs all its pieces together to be perfect so does a game and unfortunately not all the pieces play together to make that perfect symphony.

It is the characters where the first few pieces fall apart. They aren't drawn like the background they are rendered with computers with eyes so dead that you would be staring into and abyss rather than eyes. It's a shame that the characters stick out like a Picasso between ancient Greek architecture.

The character dialogue is overall well written and makes you feel for the characters in this tale but where is most stories you see the characters grow over time here you only get to know them. The story is so short that there is no room for growth of change, they stay at the same place and never change.

Lastly the voice acting, this is a hit and miss, like a drunk violinist it manages to sometimes play beautiful notes but overall it leaves a bad taste in your mouth for you know they could have done better.

Even though the story and gameplay make it a fun game and does ask for more there are parts in this game that make the experience less. It's like a beautiful symphony that gets ruined by a drunk violinist and a conductor that seem lost to what the symphony is playing.

If you like story based games and can handle a short play this is one for you otherwise if the things I pointed out annoy you too much then this game is not for you, otherwise take a look and maybe you will be leaving with an orchestra playing swan lake for you.

Easy, land the green cube on the platform.
Little challenged.

Playable.

. First part of Call of Slender Alan Wake: Just Kidding Edition DLC.. Absolutely fantastic game absolutely IMPOSSIBLE TO PLAY WITH THE CONSTANT STEAM NOTICES blocking your view and destroying the pleasure and your score.. Best Astro-Port shmup I've played so far!

Thought I'd give it a try because the warp mechanic sounded promising. 90 minutes of gameplay later it has me 100% convinced:

- warping works very well indeed, never feels cheap or overpowered
- spending upgrade points at the end of a level adds a welcome layer of strategy to the game, it's fun to try out different builds
- controls are fluid and precise, just how it should be
- great level and enemy design, will give you some "whoa, cool!"-moments
- good music and sfx, that don't get into the way of enjoying the game
- creepy horror aesthetics work nicely for the game (even though I'm not too much into the mud and gore color scheme myself)
- simple but challenging scoring system (collect all shield items over the course of a stage, don't die)

There is a practice mode, replays, 5 difficulty levels and even a save option.

Well worth the \$5 if you like hori shmups and unique mechanics!. This game is dead. And full of bugs. There is no optimization. There is no customer support.
Why do they do this in the first place?

This game was awesome, one of the best at its time. I've played this for a ♥♥♥♥ing long time a decade ago. Loved every grinding minute of it.

But if the publisher wanna revive it and operate like this then it better stay dead.

Terrible.
